COMPANY OVERVIEW

INTRODUCTION TO MMB ELECTRICAL

MMB Electrical Services provides premium custom solutions for a variety of project requirements across the commercial and industrial sectors. Services include design, manufacturing and installation provided by the completely in-house engineering and design team. With a local workshop and on-site installers, MMB is able to deliver an exceptional quality with compressed lead times. It's a service that is unmatched.

When you're seeking professional, personable and people-first electrical services, the answer is simple – choose MMB.

MMB Electrical Services is owned and operated by Michael Mclean, a highly qualified electrician with experience spanning decades. With a foundation built on professionalism, efficiency, and thoughtful customer service, MMB has established itself as a trusted provider. Since its inception 7 years ago, MMB has grown rapidly, earning a reputation for delivering top-tier craftsmanship and prioritising customer satisfaction.

CORE VALUES

Integrity

Honesty and respect are integral to MMB's operations. Every step of the way, MMB builds trust with clients, suppliers, and employees through open and honest communication, maintaining a transparent supply chain and sourcing local materials where possible.

Cost Effective Solutions

MMB understands that projects need to meet a budget while not sacrificing quality. With a team that's completely in-house, including the capabilities to manufacture switchboards, MMB provides the unique ability to deliver premium services at an affordable price.

Team Safety

The MMB team are qualified electricians and engineers with Electrical Licenses issued from the Energy Safety Division of the Department of Mines, Industry Regulation and Safety, and relevant tertiary studies for engineering. Regular training is completed by the team at MMB to ensure each employee is confident and capable of upholding safety standards throughout all tasks.

Innovation

MMB embraces innovation, staying at the forefront of technological advancements in the electrical industry. The team actively seeks out new techniques and technologies to provide cutting-edge solutions that enhance efficiency, sustainability, and performance for their clients.

High Quality

Whether it be in the materials MMB sources, the techniques applied, the training completed or the tools and equipment that are used – MMB strives for excellence, executing projects with meticulous attention and finesse.

Reliable

When you entrust MMB with a project, you'll know that it'll get done, and get done well. Not only will the project be completed within your timeline, but it will be completed consistently with active communication and an organised and dependable approach that allows you to take a step back and focus on other tasks.

Customer Service

Maintaining strong relationships is at the heart of MMB's operations. From the initial consultation to the project management through to completion – the client's needs are prioritised. In fact, it's this customer focus that keeps clients coming back to MMB for different services.

KEY EXPERTISE

Switchboard Manufacturing

Electrical Contracting

BMS and Controls

KEY EXPERTISE

SWITCHBOARD MANUFACTURING

Switchboard manufacturing involves the design, assembly, and installation of electrical panels that serve as the central control hub for electrical power distribution in a building or facility. At MMB Electrical, our switchboard manufacturing process begins with a comprehensive analysis of the project's electrical requirements, taking into account factors such as load capacity, safety regulations, and operational efficiency. We then design custom switchboards, incorporating high-quality components and state-of-the-art technologies to ensure optimal performance and reliability.

Specialists in custom control panels and LV switchboards

Qualified Electricians and Engineers

Complete in-house manufacturing

Compliance and safety

Excellent customer service

Approved suppliers of Elsteel and Rittal modular enclosures

Premium quality products

Compressed lead times

Industry standards

Supporting documentation

LV Switchboards

MMB Electrical has an experienced team of electricians and builders to deliver your next Switchboard or MCC. With our fully integrated and experienced team, we offer the complete service under one roof. From supply chain management to completion of the product – MMB Electrical is able to deliver on tight frames and offer a reduced number of interfaces to the client.

Custom Control Panels & Remote Operator Panels

MMB Electrical excels in the construction of various custom control panels, offering a comprehensive range of services. This includes the supply, programming, and installation

of Programmable Logic Controllers (PLCs) or Direct Digital Control (DDC) controllers, as well as installation-only options. We take pride in manufacturing all our custom control panels at our well-equipped workshop located in Perth, Western Australia.

KEY EXPERTISE

ELECTRICAL CONTRACTING

Our team of skilled licensed electricians work closely with business owners and project managers within the commercial and industrial sectors to ensure the safe and efficient routing of electrical wiring. By adhering to industry standards and utilising advanced techniques, MMB Electrical delivers a seamless electrical system that exceeds the client's expectations in performance, providing a reliable and comfortable environment for business operations.

- Personalised service
- Timely and reliable
- Expertise and experience
- Energy efficiency and sustainability
- NECA Association members
- Customer-focused
- 100% success rate meeting deadlines
- Compliance and safety
- Local and reliable Perth team
- Integrated services

With over 20 years of experience in the construction and industrial sectors, MMB provides premium electrical contracting and engineering services for a wide range of projects. To begin your project, MMB will require the project's specifications, layout shop drawings and equipment schedules if applicable. Tendering and direct enquiries will be quoted and once a project is awarded it then goes to MMB's specialist design team to produce design documentation for approval. MMB's integrated services allow for unique benefits such as meeting tight deadlines, flexibility to respond to last minute changes and the ability to provide a high-level project efficiently and professionally. To enquire about MMB's electrical contracting and project management, contact the MMB team today.

KEY EXPERTISE

BMS & CONTROLS

Servicing the commercial and industrial mechanical services construction projects, MMB designs centralised control systems that allow for seamless monitoring and control of all building management systems (BMS), optimising energy usage, maintaining comfortable indoor environments, and enhancing overall operational efficiency. By leveraging advanced technologies and MMB's expertise in BMS and Controls, the team delivers robust and user-friendly solutions that empower clients to effectively manage and optimise their building's performance.

- Custom solutions
- Reliable and efficient processes
- Energy efficiency
- Ongoing support and maintenance
- Extensive experience
- Build, supply and installation
- Integrated capabilities
- Premium quality
- Strong client focus
- Friendly Perth team

MMB Electrical provides complete builds, upgrades of existing systems as well as installation and ongoing maintenance. A new BMS should be an essential consideration of any major building fit-out or plant upgrade. Systems older than 10 years would benefit from an upgrade or replacement. In order to commence your project, please get in touch with the MMB team with any layout shop drawings or equipment schedules if applicable.
